USE OF SUFFIX NOTATION

STANDARD INTERIORS

Each part number will carry a suffix notation identifying those parts with that part of DS76 which describes the decorative finish. Parts so manufactured will then be rubber stamped with their part number plus this suffix notation.

Example: 72520121-001 XXX2
= Bulkhead finished in blue

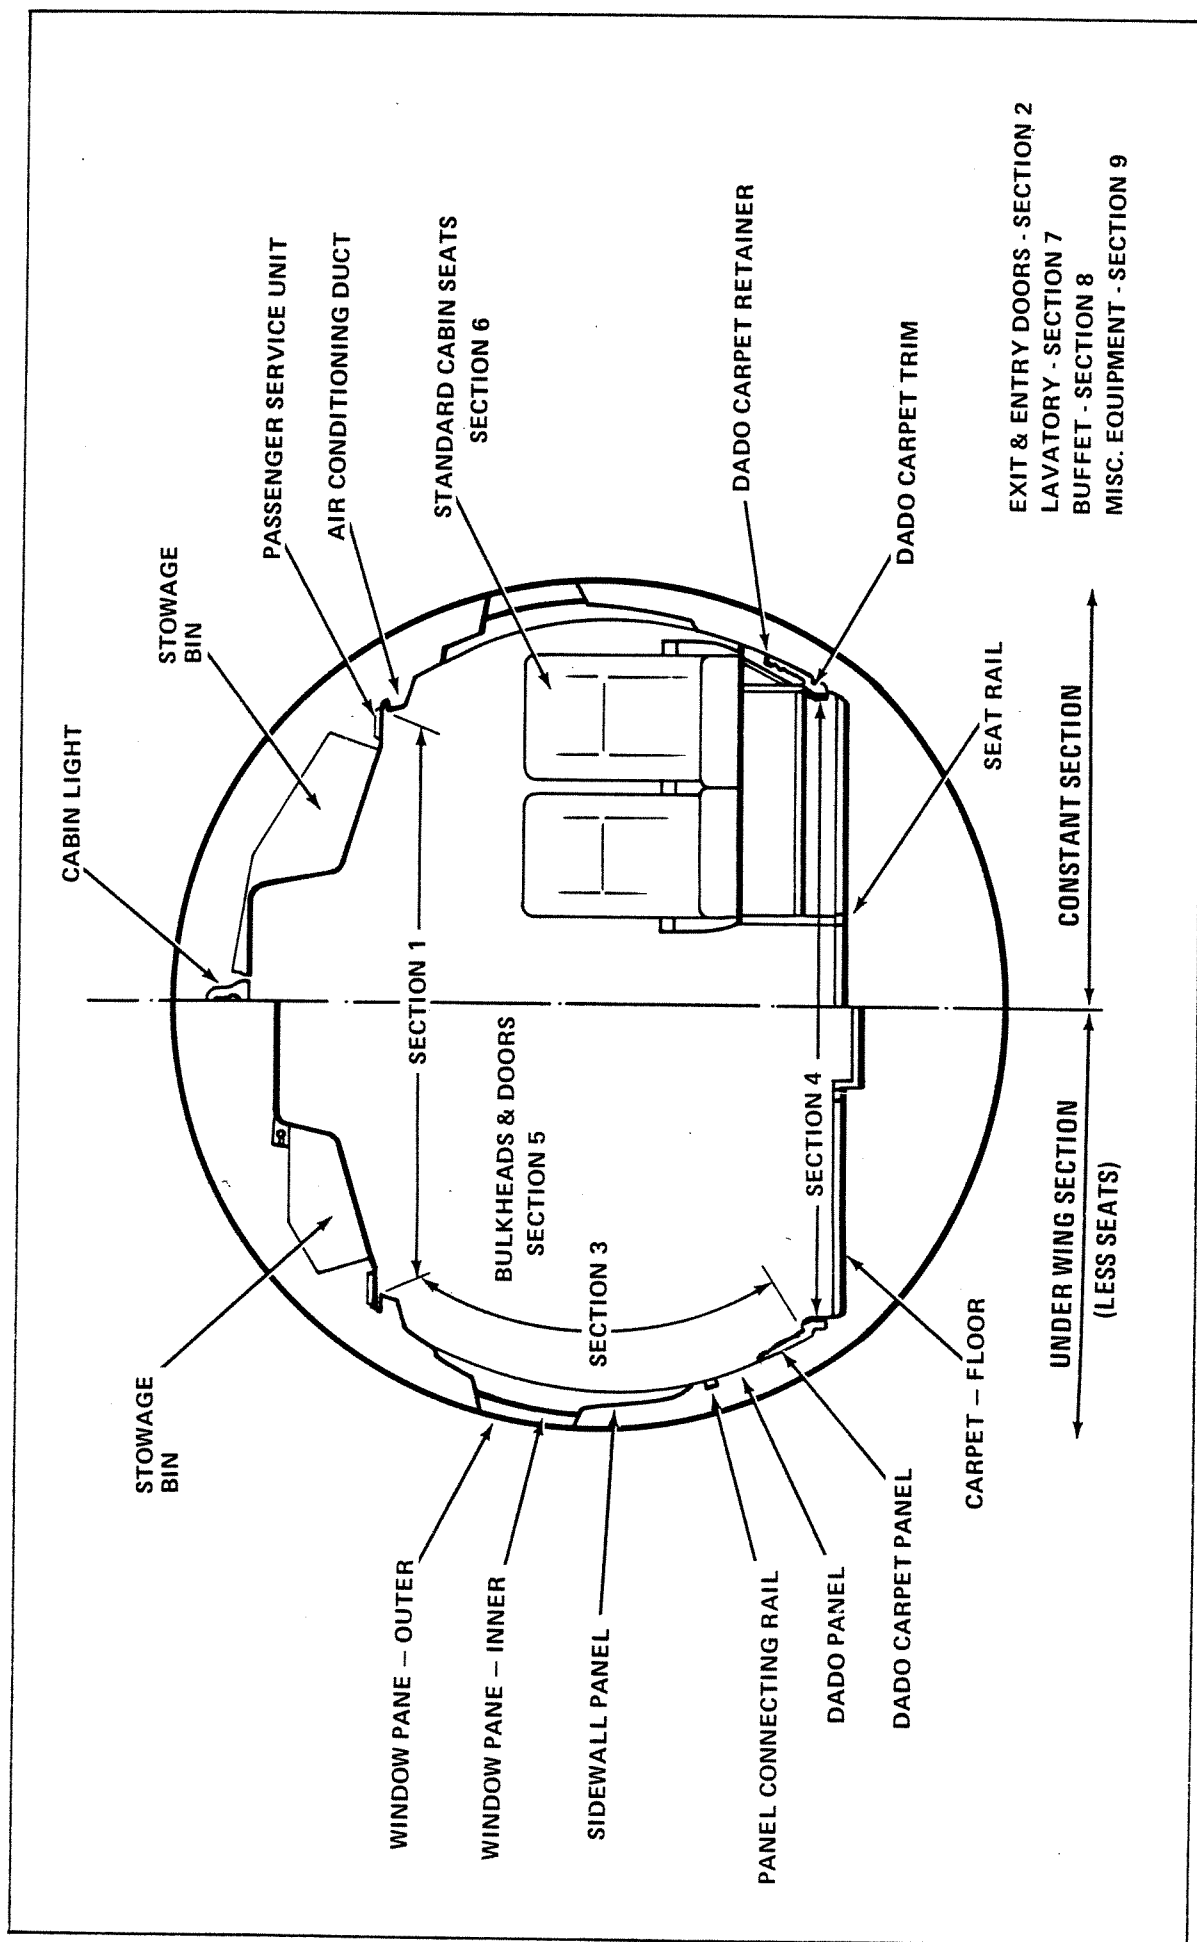

CUSTOMER SPECIAL INTERIORS

The first two letters of the suffix will identify the customer, if applicable, and the following numerals will identify aircraft ordered by that customer.

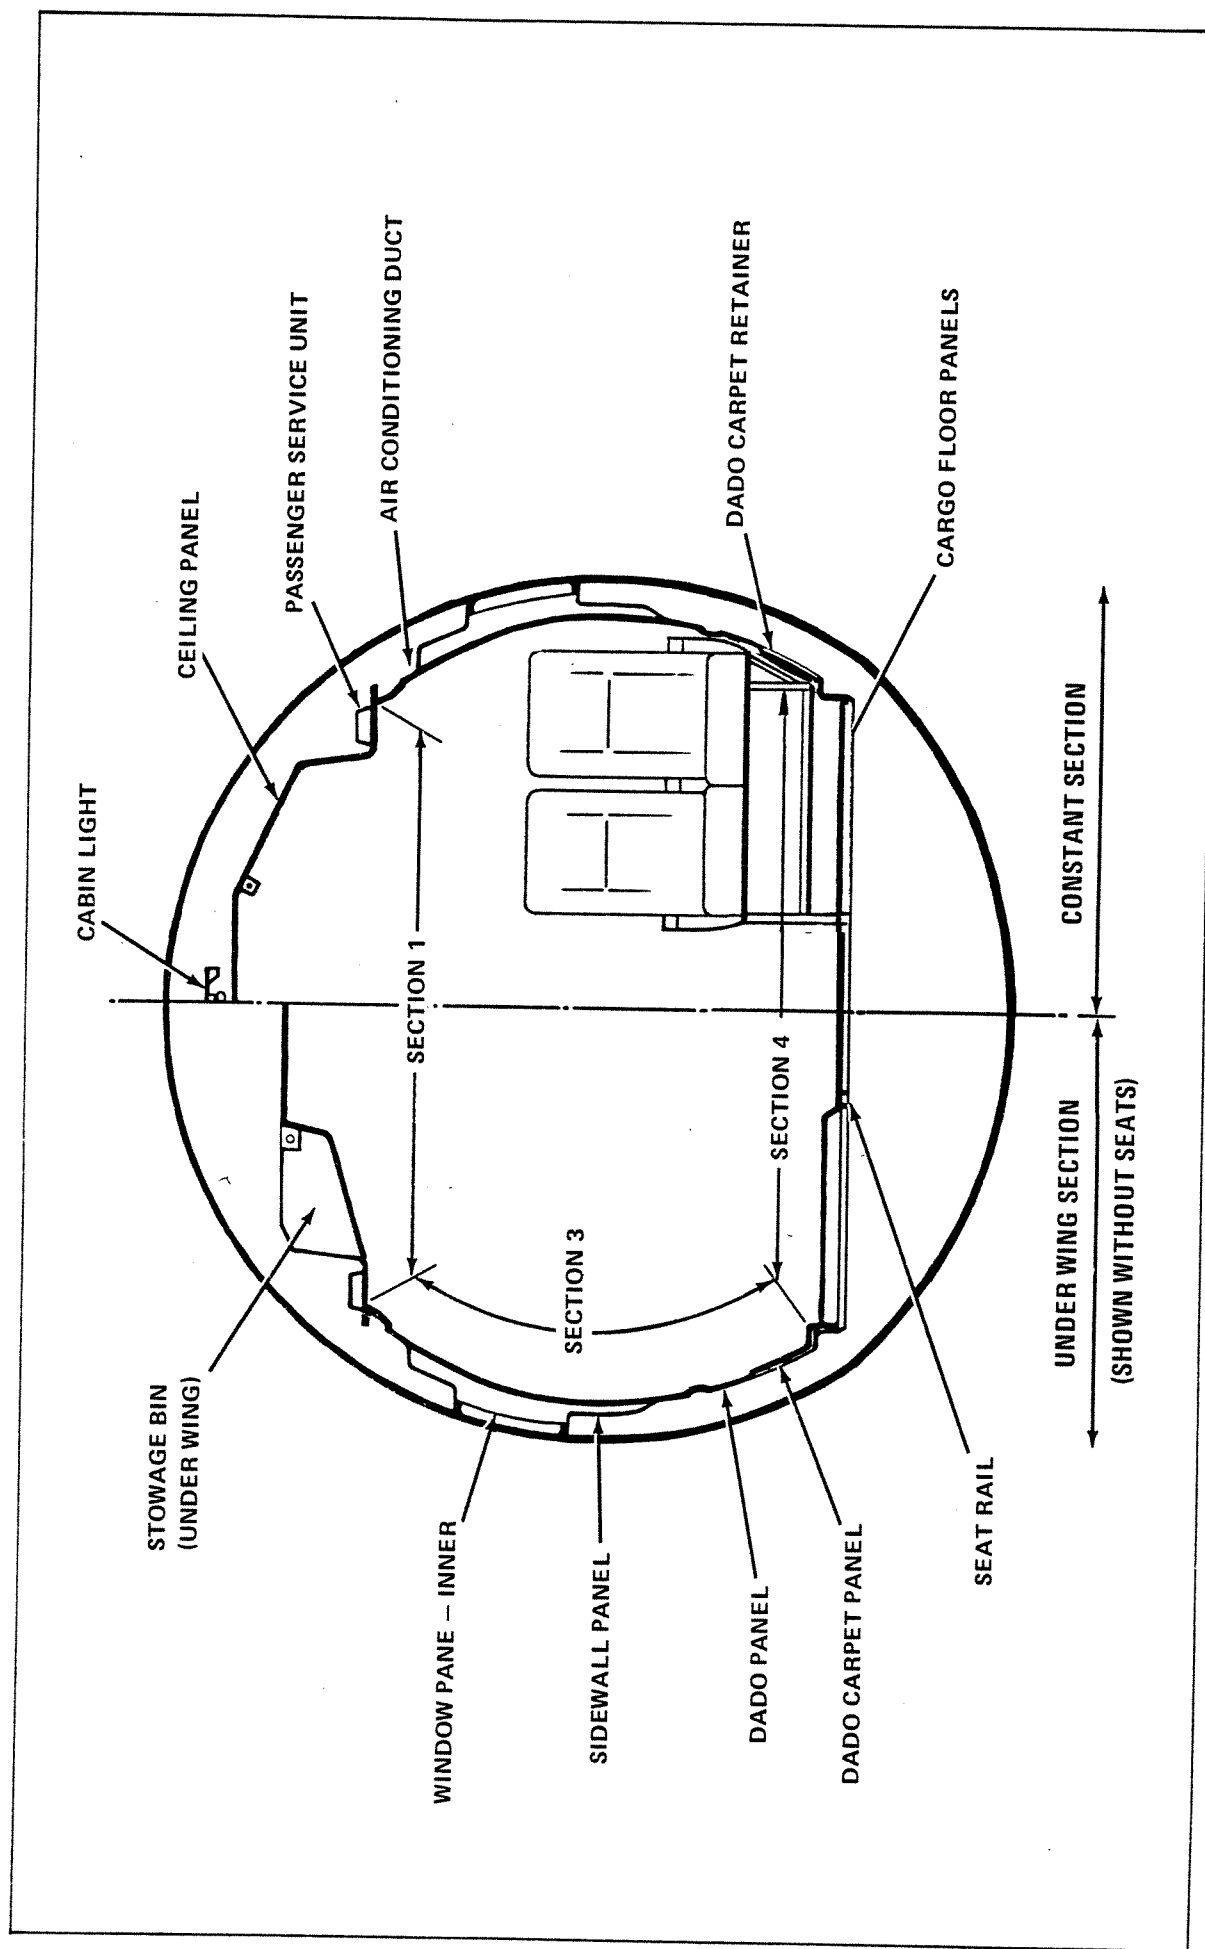

Example: XY01 = XY XY Airlines
01 1st Aircraft

See following page(s) for customer suffix notation register.

IDENT	FINISH DEFINITION
XXX0	STD WHITE & WHITE/BEIGE
XXX1	STD GOLD
XXX2	STD BLUE
