
DM9010.05 Supersession List (EO7336)

INTRODUCTION

2021-04-12

The following pages list replacement hardware and material for use on the DHC-8.

ISSUE: ALL

This report has been created from DM9010.05 Revision --, dated March 13, 2020. After this date, any substitution has been approved through RFC's in accordance with DM9010.01.01.01.

The "Old Part Number" and the "New Part Number" are replaceable with the degree of substitution as defined below.

SUBSTITUTION CLASSIFICATIONS

S = Superseded

The part number currently called out on the drawing and the substituted part are not interchangeable. Existing stock to be used to depletion. New drawings shall use new parts. Current drawings shall be revised at the earliest opportunity to reflect the superseded part number.

R = Replaced

This classification indicates the substituted part is a satisfactory replacement for the part currently called out on the drawings. Drawing part number callout and substituted part are interchangeable. Current drawing part number shall not be revised.
