Issue: **ALL**

June 1, 2017

INTRODUCTION

The following pages list replacement hardware and material for use on the DHC-8 Series 400 program.

The partners listed herein and indicated by an asterisk "*" are solely authorized to use the replacement hardware and material items as specified below.

The "Old Part Number" and the "New Part Number" are replaceable with the degree of substitution as defined below.

SUBSTITUTION CLASSIFICATIONS

S = Superseded

The part number currently called out on the drawing and the substituted part are not interchangeable. Existing stock to be used to depletion. New drawings shall use new parts. Current drawings shall be revised at the earliest opportunity to reflect the superseded part number.

R = Replaced

This classification indicates the substituted part is a satisfactory replacement for the part currently called out on the drawings. Drawing part number callout and substituted part are interchangeable. Current drawing part number shall not

X = Scrap

The procurement and use of the part number called out on the drawing shall be discontinued immediately. Existing stock on hand should be scrapped as soon as the substituted part becomes available. Scrapped parts may be salvaged by Materail Review Board procedures. New drawings shall use new parts. Current drawings shall be revised at the earliest opportunity to reflect the new part number.

Part numbers that have been added or changed since the last revision of this document are designated by a change bar | located at the left side of the "Old Part Number" field.
