

As of April 11, 2016, the following PPS's have been released, having been revised as noted below:

PPS 25.57, Issue 8 - Application of DHMS A6.10 Type I Adhesive

- Specified that compressed air shall meet the requirements of BAERD GEN-018.
- Revised Facilities Requirements section to include reference to PPS 13.39 for additional requirements.
- Revised Facilities Requirements section wording.
- Specified to solvent clean to PPS 31.17 following scuffing rubber parts (Silicone) when preparing such surface for bonding.
- Revised Personnel Requirements section to refer to PPS 13.39 for additional requirements.

PPS 32.07, Issue 12 - Corrosion Protection of Magnesium Alloys

- As this process is no longer being performed in Bombardier Toronto, deleted internal Quality documents and just specified the requirements (i.e., deleted QDI-09-02 and EWI-26-03-02.02).
- Revised Facilities Requirements section to include reference to PPS 13.39 for additional requirements.
- Revised Facilities Requirements section wording.
- Specified that all testing and evaluation specified in PPS 32.07 shall only be performed by Bombardier Toronto Materials Laboratory or by laboratories accredited according to BAERD GEN-018.
- Revised Personnel Requirements section to refer to PPS 13.39 for additional requirements.
- Added new section 10, "Disposal of Chemical Wastes". Specified to dispose of all chemical waste according to national legislation and local regulations.
- Clarified that continuous arrow indicates further processing, if applicable, in Flow Chart 1 and Flow Chart 2.

This revision notice lists brief summaries of technical changes introduced for each of the revised PPS's. Please note that these summaries are not detailed and are intended only to assist in alerting PPS users to changes which may affect them; refer to the applicable PPS for authorized, detailed procedure and requirements.
