

As of May 2, 2016, the following PPS's have been released, having been revised as noted below:

**PPS 6.14, Issue 15 – Swage Installation of Wiggins and Hydraflow Fittings**

- Revised figure showing minimum straight length before bends to delete possibly misleading annotation.
  - Revised caution regarding exposure of hydraulic fluid lines and components to be used with MIL-H-5606 hydraulic fluid to solvent blends containing isopropyl alcohol to delete reference to documents superseding MIL-H-5606.
  - Added to the Safety Precautions section a statement regarding the safety precautions in general, explaining that the safety precautions specified are specific to Bombardier Toronto (de Havilland) to meet Canadian Federal and Provincial government environmental, health and safety regulations and that suppliers, subcontractors and partners are responsible for ensuring that their own environmental, health and safety precautions satisfy the appropriate local government regulations. Note: This paragraph is taken, with a little modification, from PPS 13.26 (para. 3.6) and has been added to this PPS to highlight this provision.
