

As of December 22, 2016, the following PPS's have been released, having been revised as noted below:

PPS 30.14, Issue 7 - Heat Treatment of Titanium and Titanium Alloys

- Specified Argon gas to CGA specification Grade C in place of Grade E.
- Revised Facilities Requirements section to include reference to PPS 13.39 for additional requirements.
- Revised Facilities Requirements section wording.
- Specified that all testing and evaluation specified in PPS 30.13 shall only be performed by Bombardier Toronto Materials Laboratory or by laboratories accredited according to BAERD GEN-018.
- Replaced "oven" with "furnace" throughout.
- As this process is no longer being performed in Bombardier Toronto, hence, specified that safety precautions applicable to the materials and procedures specified herein shall be defined by the subcontractor performing the work for Bombardier Toronto.
- Revised Personnel Requirements section to refer to PPS 13.39 for additional requirements as this process has been categorized as a controlled critical process.

This revision notice lists brief summaries of technical changes introduced for each of the revised PPS's. Please note that these summaries are not detailed and are intended only to assist in alerting PPS users to changes which may affect them; refer to the applicable PPS for authorized, detailed procedure and requirements.
